

# CROME<sup>TM</sup> HOLE GROOMER

- Precision trimming and gauging, together with pressing down any peaking of the hole above the cup
- Suitable for both soil and sand based greens

**Undersize hole with  
growth fringe**

**10 Seconds later  
Precision groomed**

**Checked by standard  
4.25 inch hole gauge**

**Precision hardened and tempered cutting blade**

**Unique pressure cutting action between blade and base plate results in very little wear**

**Various mounting brackets are available to suit Toro, Jacobsen, John Deere, etc. greens mowers**

### **GENERAL**

**On major New Zealand courses, where the groomer is in use, greens superintendents have reported significant savings in labour hours on green maintenance together with extended playing life of the holes.**

**Even on courses where new pin placements are on a daily basis, the new hole should be groomed to remove any minor imperfections or peaking caused during cup placement.**

**NZ PATENT No.: 513315  
P.C.T. APPLICATION No.: NZ02/00146**
